### Time-tested quality

Due to their extreme shock resistance, outstanding food-safe properties and their resistance to low temperatures, **Polystone®** wall protection panels made of high-grade polyethylene plastic are the better alternative to conventional wooden and MDF panels or concrete impact protection.

The required set of optimum properties of **Polystone®** wall protection panels is optimally adapted to the needs of store construction as well as of refrigeration and air-conditioning technology.

**Polystone®** panels protect walls, door frames, shelves, counters and other surfaces subject to wear and tear from damage:

- Particularly suitable for mounting in rooms and halls with passenger and carrying traffic
- Due to the high wear resistance, they can also be used at very low temperatures in slaughter houses and cold stores
- Protecting walls and buildings against damage by industrial trucks or other means of transport

**Cold-resistant:** Polystone® wall protection panels remain ready-for-use even at low temperatures

**Discounter-tested:** Polystone® wall protection panels are extremely shock and impact-resistant

### Fields of application

- Refrigeration and air-conditioning plants
- Store construction/discounters
- Hospitals
- Commercial/industrial operations
- Sports facilities
- Schools
- Public buildings
- Food service industry
- Airports
- Train stations

### Properties

- Water-resistant, easy-to-clean and resistant to fats and conventional cleansing agents
- Cold-resistant to -50° C
- Physiologically harmless in the food industry
- Easy screws installation
- Extremely shock and impact-resistant
- Good shape retention

### Delivery range

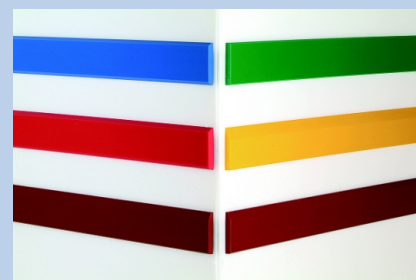

#### Dimensions

Length: 2,000 mm, 3,000 mm  
Thickness: 20 mm  
incl. chamfers (radius) and also available drilled.

#### Colors

natural, black

Standard lengths and colors are available **ex stock**. We will supply, on request, practically in any color, any dimensions and finishes.

**Versatility:** Polystone® wall protection panels are available in practically any colour required
