

**Dr. Andrea Rocca**

Executive Vice President Röchling Automotive  
Europe South  
America South

Dr. Andrea Rocca, born on November 27, 1962 in Turin, Italy, studied mechanical engineering at Politecnico di Torino University, where he earned his doctorate. Subsequently, he acquired a Master's degree in plastics materials engineering from Kensington University in the USA. After his apprenticeship, he worked from 1983 to 1993 in various functions at his parents' company, an automotive supplier in the plastics industry based in Turin. There, he was laboratory supervisor, director of tool development, director of production and logistics, and finally technical director. In 1994, Dr. Rocca became co-owner and managing director of the company Autoengineering. He also worked as a freelancer for the former Seeber Leifers at the same time. In 2000, Seeber and Autoengineering founded a joint venture, and Dr. Rocca assumed the role of managing director of the Competence Center. In 2004, he was appointed Technical Director of Röchling Automotive Leifers. Dr. Rocca is responsible for the Europe South and America South regions.
