

Polystone® P HG EHS

PP-H

High-performance polypropylene especially for the Healthcare industry

In addition to its good hot steam sterilizability, this special material has good machinability and excellent chemical resistance. Polystone® P HG EHS is an isotactic, highly heat-stabilized polypropylene that is available as a homopolymer. This unique property profile makes it perfect for components for respiratory equipment or for applications in the pharmaceutical industry, either as a distribution unit, components for drug production or in chromatography.

Operating in the following industries

Extended characteristics

- 

Sterilization resistance
After 200 cycles of heating steam sterilization at 134°C, 10 minutes, 3.1 bar chamber pressure, it shows no change in mechanical properties or color.
- 

High flexibility
A wide range of colours and dimensions are available. Please contact us directly – we will be happy to answer your questions.
- 

Good machinability
Polystone® P HG can be processed very well within narrow tolerances using conventional CNC machines. The material is also dimensionally stable.

- 

Biocompatibility
Tested on the semi-finished product and approved in accordance with ISO 10993-5 and/or USP Class VI. Further test series are available on request.
- 

Quality Management
The highest level of quality and performance in products, processes, the safety and health of our employees and the careful use of resources.
