

## SustaPEEK MG

### PEEK

#### Our premium material especially for medical devices

SustaPEEK MG was developed for the demanding requirements of the healthcare industry in particular medical devices. As a material of highest purity with exceptional resistance to sterilisation, it is e.g. ideal for surgical instruments. Thanks to its very high strength and rigidity, SustaPEEK MG ensures reliable performance in all applications. It retains its shape and property profile even under extreme conditions. With its excellent temperature stability of up to 250 °C in continuous use, it offers reliable performance.

#### Působíme v následujících odvětvích

#### Rozšířené vlastnosti

##### Sterilisation resistance

Tested for hot steam (134°C, 10 minutes, 3.1 bar) up to 2,000 cycles (without additional cleaning). Other common sterilisation processes are also possible.

##### Excellent chemical resistance

Resistant to alkalis, organic and inorganic solvents, even at high temperatures. It also has very good hydrolysis resistance.

##### High continuous service temperature

Even at operating temperatures of 250 °C the plastic retains its chemical structure. This is particularly important for applications with a high safety risk.

##### Biocompatibility

Tested and approved on the semi-finished product in accordance with ISO 10993-5 and USP Class VI (depending on colour). Further test series are available on request.

##### Quality management

The highest level of quality and performance: Our MG products are subject to ISO 13485-certified process instructions. Change management including NOC is standard.

We are a system supplier and partner from the idea to the OEM's end product - as a cooperative value contribution. We are able to support the healthcare industry at the highest level.
