# Vacuum formable plastics for durable, high-quality bus interiors

A bus only earns money when it is moving. As an operator, you want to increase the efficiency of your buses and reduce maintenance times. The key question is: How can passengers be carried to their destination quickly, reliably and safely? And likewise important: a comfortable ride. Satisfied passengers go hand-in-hand with the efficiency, safety and design of a bus. This is why constructors have to meet many requirements when developing their vehicles.

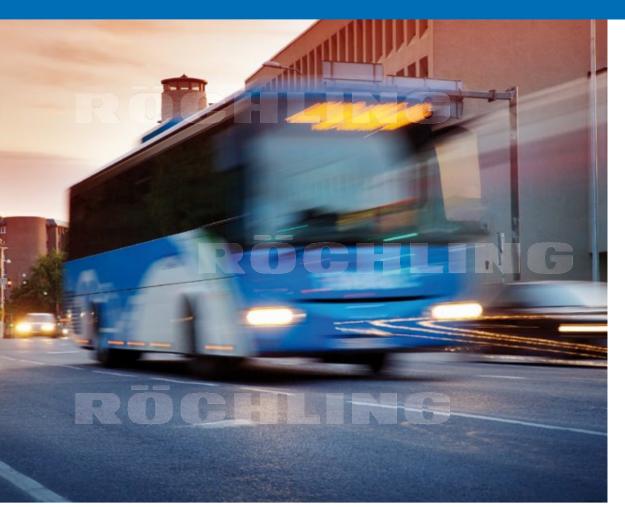

Complies with UN/ECE R 118-02 Annex 6, 7, 8

### Vacuum formable ABS and PC/ABS

MAYWOflamm<sup>®</sup> ECE , MAYWOflamm<sup>®</sup> ECE ST and Formaterm<sup>®</sup> PC/ABS professional

We assist manufacturers in the development of safe and efficient buses with our plastics. With MAYWOflamm<sup>®</sup> ECE, MAYWOflamm<sup>®</sup> ECE ST and Formaterm<sup>®</sup> PC/ABS professional, we offer vacuum formable plastics specifically for producing

- safe and high-quality interiors for buses
- certified according to new European standard ECE R 118-02, Annex 6, 7 and 8

MAYWOflamm® ECE , MAYWOflamm® ECE ST and Formaterm® PC/ABS professional: Vacuum formable plastics for bus interiors in coaches, long-distance buses, city buses and public transport

## Safe, durable and high-quality

#### Bus interiors made of MAYWOflamm<sup>®</sup> ECE , MAYWOflamm<sup>®</sup> ECE ST and Formaterm<sup>®</sup> PC/ABS professional

#### High passenger safety

- Flame-retardant Complies with UN/ECE R 118-02 Annex 6, 7, 8
- Halogen-free, certified according to VDE standard 0472-815 of the VDE Testing and Certification Institute, Offenbach/Germany

#### High-quality appearance and perceptible ride comfort

Various surface textures and almost any colour available. Also available with soft-touch surface, depending on the material

#### Durable

High mechanical strength and, depending on the material, very good UV-resistance (MAYWOflamm® ECE ST)

## **Applications**

MAYWOflamm<sup>®</sup> ECE , MAYWOflamm<sup>®</sup> ECE ST and Formaterm<sup>®</sup> PC/ABS professional are especially suitable for the manufacture of

- Side panels and interior cladding
- Roof cladding
- Dashboards
- Interior surfaces
- Rear seat shells

## Plastics for economical, safe buses

Our vacuum formable materials MAYWOflamm<sup>®</sup> ECE, MAYWOflamm<sup>®</sup> ECE ST and Formaterm<sup>®</sup> PC/ABS professional are part of our specific product range for the bus industry. At Röchling Industrial, we also offer Durostone<sup>®</sup> glass-fibre reinforced profiles, which are used worldwide for exterior and interior panelling.

## **Examples of applications**

High-quality bus interiors: Röchling Maywo developed MAYWOflamm® ECE ST with a soft-touch surface specifically for attractive bus interiors

Roof cladding made of MAYWOflamm<sup>®</sup> ECE

Interior wall cladding in a city bus made of MAYWOflamm® ECE in grey

## Vacuum formable materials for high-quality bus interiors

MAYWOflamm <sup>®</sup> ECE	$\bigcirc$	Properties
		<ul> <li>Highly suitable for vacuum forming</li> <li>Complies with UN/ECE R 118-02 Annex 6, 7, 8</li> <li>Matt surface</li> <li>Ductile fracture behaviour, no splinters</li> <li>Halogen-free, certified according to VDE standard 0472-815</li> <li>(E) type approval awarded by the Federal Motor Transport Authority (KBA)</li> <li>Product range</li> <li>Dimensions: up to 2,500 mm wide, various lengths possible</li> </ul>
		<ul> <li>Dimensions, up to 2,000 mm what, various lengths possible</li> <li>Thickness: 2-7 mm</li> <li>Various surface structures available</li> <li>Almost any colour possible</li> </ul>
MAYWOflamm <sup>®</sup> ECE ST	$\bigcirc$	Properties
		<ul> <li>Highly suitable for vacuum forming</li> <li>Very pleasant feel due to a special soft-touch surface</li> <li>Excellent resistance to UV radiation</li> <li>Complies with UN/ECE R 118-02 Annex 6, 7, 8</li> <li>Halogen-free, certified according to VDE standard 0472-815</li> <li>Ductile fracture behaviour, no splinters</li> </ul>
		Product range
		<ul> <li>Dimensions: up to 2,500 mm wide, various lengths possible</li> <li>Thickness: 3-7 mm</li> <li>Various surface structures available</li> <li>Almost any colour possible</li> </ul>
Formaterm® PC/ABS professional	$\bigcirc$	Properties
		<ul> <li>Very good vacuum forming properties</li> <li>Complies with UN/ECE R 118-02 Annex 6, 7, 8</li> <li>Halogen-free, certified according to VDE standard 0472-815</li> <li> (E) type approval awarded by the RDW </li> <li>High breaking strength and extremely high impact resistance </li> <li>Product range</li> <li>Dimensions: up to 1,500 mm wide, various lengths possible</li> </ul>
		<ul> <li>Dimensions, up to 1,000 mm wide, various lengths possible</li> <li>Thickness: 2-5 mm</li> <li>Various surface structures available</li> <li>Almost any colour possible</li> </ul>
