

Products

Sustainable Products

Target: By 2035, we want to offer our customers an alternative for each of our materials – preferably made from bioplastics or recyclates. With this, we actively support our customers to achieve their sustainability goals.

Investments & Certifications

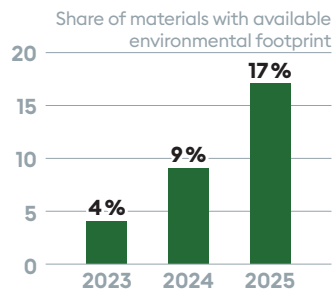

- Ten million euros investment in our Sustainability Center Geeste-Dalum/Germany – there we take back residues from own production & customers to process them into new, valuable raw materials
- Play-Tec® PCR again awarded with „Blue Angel“
- Continued ISO 13485 & IRIS certification for patient and passenger safety

Environmental Footprint

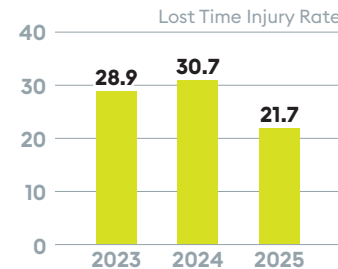

Target: By 2030, we will transparently disclose the environmental impact of each of our materials. For this, we have established a third-party certified life cycle assessment (LCA) process according ISO 14040/14044.

People

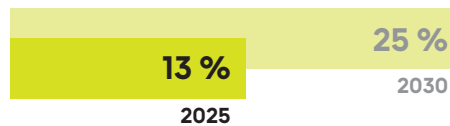

Health & Safety

Target: 50 percent reduction of the Lost Time Injury Rate by the end of 2026 compared to 2023

Diversity

Target: By 2030, women's quota in management positions of 25 percent

Employees in Focus

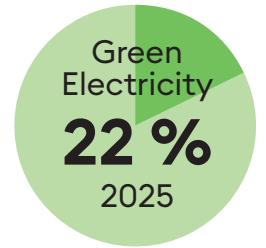

- Continued ISO 45001 certification & variety of measures to further improve work safety
- Based on our first global employee survey – with a high participation rate of 70 percent – measures are derived to further enhance an attractive working environment
- Execution of our new leadership training programme and introduction of leadership guidelines

Planet

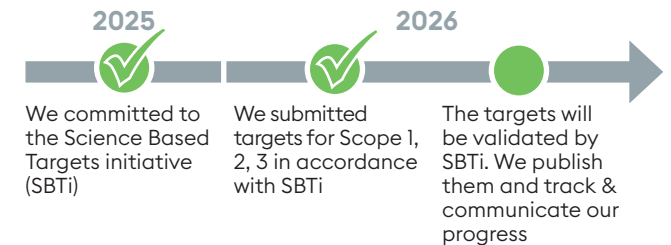

Green Electricity

In 2025, we were on track by increasing the share of green electricity to 22 percent. For this, we make use of both procurement & own generation.

Climate

Target: Validated SBTi climate targets in 2026

Energy & Resources

We successfully continued ISO 14001, ISO 50001 and ISCC Plus certification at many sites for a conscious use of energy & resources.
