

Protect What Matters with DuroProtect® 1000 Ballistic Panels

DuroProtect® 1000 is a fiberglass-reinforced composite manufactured to serve as a ballistic protection material. Constructed from layered, reinforced structural polyester laminate, DuroProtect® 1000 panels are designed for high-performance defense, engineered to progressively delaminate upon impact, distorting and flattening incoming projectiles while dispersing their energy to reduce penetration.

DuroProtect® 1000 can be added to virtually any new build, or retrofit to most existing structures for a critical layer of protection. Whether for commercial, residential, or military applications, DuroProtect® 1000 delivers protection that safeguards what matters most from ballistic threats.

About DuroProtect® 1000

- Bullet-resistant material
- UL-752 Certified Levels 1-6 and 8 BR
- Flame and fire-rated
- Made in the U.S.

For use in:

- ✓ Commercial ✓ Residential ✓ Military

Common Applications

- Guard houses
- Courtrooms
- Safe rooms
- Sports venues
- Toll booths
- Gas stations
- ATMs
- Classrooms
- VIP entrances/exits
- Conference rooms
- Window shutters/storm shelters
- Drive-up bank tellers
- Convenience stores
- Pharmacies
- Government buildings
- New builds/retrofits
