

Roman Borkowski

Chief Quality & Innovation Officer
Röchling Medical

Roman Borkowski graduated with a degree in physics from the Christian Albrecht University in Kiel/Germany and carried out a research project for metal physics at the Max Planck Institute in Stuttgart/Germany.

Since 2001, he worked for the German medical device company BIOTRONIK in various roles at the product safety department. In 2012, he assumed the role of Vice President Global Regulatory Affairs and Medical Device Safety Officer and was most recently holding a position as Senior Vice President Quality Management and Regulatory Affairs in the Cardiac Rhythm Management (CRM) division. In this role, he was responsible for the safety and quality of the CRM portfolio and its transition to the new EU Medical Device Regulation.

In June 2023, he joined the Executive Board of Röchling Medical as Chief Quality and Regulatory Officer.
